@UK PLC ('@UK')

Trading Update and Notice of Results

@UK PLC (AIM:ATUK), a leading eMarketplace provider of eCommerce and eProcurement solutions, today issues an update on trading.

Whilst turnover for the year is expected to be below market expectations, continued tight management of costs and cash means that the pre-tax losses and cash outflows are expected to be in line.

There has been progress in the discussions with major suppliers to the NHS market which were referred to in the AGM statement on 24 May 2007, and a strategically important project is at proof of concept phase. We expect to be in a position to give further updates on the development of the NHS market in our interim announcement. The Local Authority market continues to be very slow, and development of our NHS business has not yet been able to compensate for this.

These opportunities in the NHS continue to underpin our confidence in the long term prospects for @UK.

Interim results for the six months to 30 June 2007 will be announced at the end of September.

Notes to Editors:

@UK is one of the UK's leading eMarketplace providers. @UK's software provides a secure internet eMarketplace enabling buyers such as local authorities, schools and hospitals to buy online from commercial suppliers ranging from large corporations to small to medium enterprises (SMEs).

It works by linking the financial systems of bodies such as local authorities, hospitals, schools and large corporations to all their suppliers. This allows buying and selling to take place with no paperwork and no chance of transposition errors, achieving major savings throughout the supply chain.

@UK provides eCommerce to thousands of suppliers of every size, from multinational businesses to 'one man band' window cleaners and plumbers and the numbers are growing daily. Even the smallest suppliers can now trade electronically with customers creating electronic orders and more importantly raise electronic invoices for all their customers.

@UK PLC also offers services to new businesses, including incorporation, company secretary services and filing annual returns. Over 100,000 companies have been

incorporated using @UK's online company formation service.

@UK joined AIM in December 2005, raising £8 million before expenses at an issue price of 60p. In May 2006 it purchased Coding International Limited, its first acquisition since becoming a quoted company, @UK is included in the Software and Computer Services Sector (9530).
