Notes to Editors:

@UK is one of the UK's leading eMarketplace providers. @UK's software provides a secure internet eMarketplace enabling buyers such as local authorities, schools and hospitals to buy online from commercial suppliers ranging from large corporations to small to medium enterprises (SMEs).

It works by linking the financial systems of bodies such as local authorities, hospitals, schools and large corporations to all their suppliers. This allows buying and selling to take place with no paperwork and no chance of transposition errors, achieving major savings throughout the supply chain.

@UK provides eCommerce to thousands of suppliers of every size, from multinational businesses to 'one man band' window cleaners and plumbers and the numbers are growing daily. Even the smallest suppliers can now trade electronically with customers creating electronic orders and more importantly raise electronic invoices for all their customers.

@UK PLC also offers services to new businesses, including incorporation, company secretary services and filing annual returns. Over 100,000 companies have been incorporated using @UK's online company formation service.

@UK joined AIM in December 2005, raising £8 million before expenses at an issue price of 60p. In May 2006 it purchased Coding International Limited, its first acquisition since becoming a quoted company, @UK is included in the Software and Computer Services Sector (9530).
