Contract Update

@UK PLC wins contract to provide new online catalogue for NHS Supply Chain

@UK PLC (AIM:ATUK), a leading eMarketplace provider of eCommerce and eProcurement solutions, is pleased to confirm that the contract win with a major supplier to the NHS, as announced in the interim results dated 28th September 2007, was signed with NHS Supply Chain.

NHS Supply Chain is launching a new online catalogue that enables NHS trusts to order goods electronically and personalise their shopping experience. Called NHS-Cat, it will include all 500,000 products handled by NHS Supply Chain and replaces the existing catalogue database. This will ensure that NHS Supply Chain's online catalogue is always up-to-date and provides full product information at the touch of a button. Suppliers will be able to develop and manage their product catalogues online, significantly improving the control and timeliness of catalogue changes and giving product visibility to the entire NHS.

The online catalogue will be powered by @UK. It will also provide customers with a shopping basket facility - similar to other major online retailers, which is linked to NHS Supply Chain's ordering systems (Supply Chain OnLine and e-DC). This will enable every NHS trust across England to order goods electronically.

Grant Oliver, Chief Executive, @UK said: 'We are delighted to have won this contract which we believe will change the eProcurement landscape within the NHS. From our experience of working with large public sector bodies, it is clear that the scale of this new service makes it the largest eProcurement project in the UK and NHS Supply Chain's very pragmatic approach gives us confidence that it will be a resounding success. This has been evidenced in the set up phase where we have already delivered a working solution ready for roll out across the NHS.'
